DETAILED ACTION

Response to Amendment

1. The amendment filed June 26, 2009 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: a dosing slide 22 that may be rotatable in the receptacle between its filling and dispensing positions, amended page 16, lines 1-5 and Fig. 4B of the replacement drawings. The originally disclosed slide has a square cross section that fits in a housing with a complementary shape; the slide is unable to rotate along its axis as suggested in the amendments to page 16 of the specification and Fig. 4B.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claims 9 and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. A rotatable dosing element as claimed in claim 9 is not described in the original specifications.

Art Unit: 3754

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-4, 7, 8, 11, 14 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,023,715 to Biondo.

Biondo shows a dosing device for dispensing pharmaceutical preparations as seen in Figs. 1-3, having a chamber "F" releasable fix to a dosing element 10; The dosing element having a moveable dosing chamber 22" which is to be filled with preparation from the chamber "F" in a first position and dispenses in a second position, the volume in the chamber 22' is adjustable see column 3, lines 36-41, a pusher 24 moveable back and forth, a threaded spindle 29, a dosing slide 20, a compression spring 26a biasing the dosing slide into the fill position, a fixed volume insert 30 with different external dimensions A through E in other to set the volume of the dosing chamber.

The device of Biondo performs the method of dosing a product stored in a larger container through a transferring chamber to dispense a partial quantity as claimed in method claim 17.

In reference to claim 14, see MPEP 2113, "[E]ven though product-by-process claims are limited by and defined by the process; determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the

Art Unit: 3754

claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPO 964, 966 (Fed. Cir. 1985).

Response to Arguments

6. Applicant's arguments with respect to claims 1-4, 7, 8-11, 14 and 17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin A. Cartagena whose telephone number is (571) 272-4924. The examiner can normally be reached on M-F (8:30AM to 7:00 PM).

Art Unit: 3754

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin P. Shaver can be reached on (571) 272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
